“Where were you when the world stopped turnin’ that September day?”

For those of us over the age of 30, it won’t take long to reflect on where we were, what we were doing, and how we felt when we first learned of the 9/11 terrorist attacks. Many of our students have heard stories of the horror of that day. For the students in **Jim Roeder’s** Radio and Television classes (pictured left) , the magnitude of responsibility to record history became a reality when Mr. Roeder shared 9/11 footage from multiple networks. Mr. Roeder emphasized newscasters have a passion for telling the story, even when the story is tragic.

C⁴ Director Gene Hack encouraged the C⁴ staff today by saying, “As we do our work as essential workers, training those who will be first responders, health care providers, construction and engineering professionals, educators, welders, business and financial analysts, animal care providers, military service personnel, and service industry workers, my wish and prayer is that they will never have to experience a tragedy like this. If they do, I am confident that we are providing them with the best possible training and opportunities for them at this stage of their career.”

C⁴ welcomes Abby Selby as the new Dental Careers teacher

Abby brings over 20 years of experience in the dental field, including the last 17 years working as a dental hygienist. When asked her thoughts about her first week in the classroom, Abby acknowledged that even though it is overwhelming, she is confident she is going to enjoy this new career!

When Abby is not in the classroom, she enjoys going for walks, reading, going to concerts, and spending time with family and friends.

Mrs. Selby loves the dental field and is excited to use her experiences and knowledge to educate students who have an interest in pursuing a career in dentistry!

This week, her Dental year I and II students focused on the basics of tooth structure.

Pictured left, CNHS students **Ella Fisher** (10) and **Aditya Banerjee** (11) display their clay project showcasing the four structures of a tooth: enamel, cementum, pulp, and dentin.
